Skills

Hypertext Markup Language (HTML) - I used it to create web pages and other documents

Cascading Style Sheet (CSS)- I use this to style web page

JavaScript – used to make the web page interactive

React – I used it to create reusable UI components and edit them based on user interaction

Redux – while I'm not very good with this I use it as a state management library for JavaScript applications

An experienced front-end developer with 1 year of experience, my objective is to advance my skills in HTML, JavaScript and other front-end technologies. I am to work in a challenging environment to refine my skills in responsive design, cross platform compatibility and performance optimization

Experience

2022-Present

Front End Developer The Bulb Africa

Responsibilities

- Worked with a team of developers (2 front-end developers, 2 backend developers and 2 DevOps engineers) to build a hospital management system.
- I built my Personal portfolio using React, Tailwind CSS and React icons.
- Implemented websites and landing pages from concepts through deployments
